INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference N.78803A	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/GB99/03738	International filing date (day/month/year) 10/11/1999	Priority date (day/month/year) 10/11/1998
International Patent Classification (IPC) or national classification and IPC C12Q1/18		
Applicant ISIS INNOVATION LIMITED et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 7 sheets, including this cover sheet.

- ☐ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☒ Certain defects in the international application
- VIII ☒ Certain observations on the international application

Date of submission of the demand 26/05/2000	Date of completion of this report 15.12.2000
Name and mailing address of the international preliminary examining authority:  European Patent Office D-80298 Munich Tel. +49 89 2399 - 0 Tx: 523656 epmu d Fax: +49 89 2399 - 4465	Authorized officer Herrero, M Telephone No. +49 89 2399 8542

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB99/03738

I. Basis of the report

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments (Rules 70.16 and 70.17).):*

Description, pages:

1-8 as originally filed

Claims, No.:

1-19 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB99/03738

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	1-18
	No:	Claims	19
Inventive step (IS)	Yes:	Claims	
	No:	Claims	1-19
Industrial applicability (IA)	Yes:	Claims	1-19
	No:	Claims	

2. Citations and explanations see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

SECTION V

2. CITATIONS AND EXPLANATIONS

2.1 In view of the priority documents pertaining to the present application, the international patent application WO 99/18211 (publication date 15.04.99), cited in the International Search Report under the "P" category, is not to be regarded as state of the art according to Rule 64 (1) PCT as the date of priority of 10.11.98 is hereby validly claimed.

2.2 The following documents have been considered for the purposes of this report:

D1: WO 97/00325 (also cited in the description)

D2: WO 98/26087 (also cited in the description)

D3: WO 98/26088 (also cited in the description)

D4: WO 92/05244

2.3 Novelty and inventive step (Art. 33(2) and (3) PCT)

The present application does not satisfy the criteria set forth in Article 33(2) and (3) PCT because,

- a) the subject-matter of Claim 19 is not new in respect of prior art as defined in the regulations (Rule 64(1)-(3) PCT)
- b) the subject-matter claimed (Claims 1-19) does not involve an inventive step (Rule 65(1)(2) PCT).

It transpires from the introductory passages in the description (see page 1, lines 5-23) that the technical problem to be solved by the present application relates to the provision of improved whole-cell assays for inhibitors of chromosome partitioning and cell division functions, which are devoid of the drawbacks derived from the use of close-related determination assays indicative of potential anti-microbial properties, in particular those assays described in D1, D2 or D3.

As a solution to the problem posed, the application proposes whole-cell assays based on the use of genetically engineered *Bacillus subtilis* strains which permit the detection/identification of inhibitors of cell division (i.e. putative antibiotic compounds) which act on a corresponding protein product of a pathogen (e.g. from *Staphylococcus aureus*) but not on that of the parent *Bacillus* strains.

It is clearly stated in the description (see page 5, lines 14-31 and pages 6-7), that the three main different approaches useful to carry out the detection assays of interest proposed in the application, are based on corresponding assays of the closest-state of the art documents D1, D2 and D3 .

The only characterizing feature which distinguishes the three main types of assays hereby described from the corresponding assays disclosed in D1, D2 and D3, respectively, consists in the (total or partial) replacement of a target gene involved in cell division (e.g. *ftsZ*) in the subject *Bacillus* strain with a homologous gene (or an equivalent section of a homologous gene), likewise involved in cell division, obtained from a different microorganism (for example, from a pathogenic *Streptococcus pneumoniae*).

However, the partly or wholly replacement of a target gene of a well-characterized microorganism (e.g. *Escherichia coli*, *Bacillus subtilis*, *Saccharomyces cerevisiae*, etc) with a functionally equivalent gene originated from a different cell source in order to facilitate/make feasible the characterization of the latter gene in a (micro)biological system easy to be handled, is in fact a working feature which has been conventionally employed in related technical fields (for instance in D4) for a variety of standard purposes, e.g. for screening active ligands or antagonistic compounds.

Regarding the foregoing it would appear that, in order to solve the underlying technical problem, it would have been obvious to the person skilled in the art to apply the aforementioned working feature (e.g. a replacement with a functionally equivalent gene of a non-easily culturable pathogenic strain) with corresponding effect to the particular assay systems based on the use of the specific *B. subtilis* engineered strains taught by D1, D2 and D3 thereby arriving at microorganisms

equivalent to those intended in Claims 1-9 and 16 and at methods similar to those according to Claims 10-15 and 17-18. The subject-matter claimed according to Claims 1 to 18 does therefore not involve an inventive step (Article 33(3) PCT).

Additionally it is noted that, contrary to the requirements of Art. 33(2) and (3) PCT, the subject-matter of independent Claim 19 is neither novel nor inventive. The method of killing or inhibiting the growth of bacteria according to present Claim 19 cannot be distinguished from the corresponding methods according to Claim 11 of D2 or Claim 10 of D3. Moreover, it is pointed out that in the light of the supporting description, where no suitable agent capable of inhibiting the growth of the microorganisms of interest is characterized, Claim 19 merely recites an obvious *desideratum* (see in this regard item 2 in Section VIII below).

SECTION VII

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document D4 is not mentioned in the description, nor is this document identified therein.

SECTION VIII

1. It is clear from the description that, to serve the purposes of the present invention, the microorganisms intended to be claimed according to Claims 1-3 should possess, at least, the following characterizing features:
 - (1) the required microorganisms belong to a *Bacillus* strain capable of growth and sporulation (see the description as a whole)
 - (2) in said *Bacillus* strain a cell division gene has been partly or wholly replaced by a homologous gene from another bacterium (cf page 7, lines 25-29)

- (3) two artificially introduced reporter genes are present, a first reporter gene having a promoter which is dependent on active σ^F or σ^E factors, and a second reporter gene which provides a measure of the synthesis of the (inactive) σ^F or σ^E factor (cf page 5, lines 20-25; page and page 7, lines 19-23.

Since independent Claim 1 does not contain these features it does not meet the requirement following from Article 6 PCT taken in combination with Rule 6.3(b) PCT that any independent claim must contain all the technical features essential to the definition of the invention.

2. Independent Claim 19 does not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined. The claim attempts to define the subject-matter in terms of the result to be achieved which merely amounts to a statement of the underlying problem. The following functional statements do not enable the skilled person to determine which agent is necessary to perform the intended method: "an agent which inhibits the growth of a micro-organism of any one of claims 1 to 9"
3. The following (underlined) expression "an artificially introduced reporter gene is present and is expressed in a manner related to a homologous gene expression product" used in the sentence bridging pages 1-2 and in independent Claim 1 is vague and open to interpretation and leaves the reader in doubt as to the meaning of the technical features to which it refers, thereby rendering the definition of the subject-matter of said Claim 1 (and of the claims dependent thereof/appended thereon) unclear, contrary to Article 6 PCT.

The same unclarity deficiency (Art. 6 PCT) arises from the passage on page 2, lines 17-20 as long as this recites: "... it is necessary that the homologous gene be capable of forming an expression product that is different in some respect from the expression product of the target gene."

4. It appears that on page 3, line 19 was meant to read " β -glucuronidase".

Applicant

ISIS INNOVATION LIMITED et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority considers the following date as the date of receipt of the demand for international preliminary examination of the international application:

26/05/2000

2. This date of receipt is:

- ☒ the actual date of receipt of the demand by this Authority (Rule 61.1(b)).
- ☐ the actual date of receipt of the demand on behalf of this Authority (Rule 59.3(e)).
- ☐ the date on which this Authority has, in response to the invitation to correct defects in the demand (Form PCT/IPEA/404), received the required corrections.

3. ☐ **ATTENTION:** That date of receipt is **AFTER** the expiration of 19 months from the priority date. Consequently, the election(s) made in the demand does (do) not have the effect of postponing the entry into the national phase until 30 months from the priority date (or later in some Offices) (Article 39(1)). Therefore, the acts for entry into the national phase must be performed within 20 months from the priority date (or later in some Offices) (Article 22). For details, see the *PCT Applicant's Guide*, Volume II.

- ☐ (If applicable) This notification confirms the information given by telephone, facsimile transmission or in person on:

4. Only where paragraph 3 applies, a copy of this notification has been sent to the International Bureau.

PCT-EASY INFORMATION SHEET

(For applicant use only, DO NOT submit this sheet with the international application)

VALIDATION LOG

	States
Green?	More designations could be made. Please verify.
	Contents
Green?	The international application contains no drawings. Please verify.
Yellow	Accompanying item "separate signed power of attorney" has not been indicated as enclosed.

Before submitting the International Application, please carefully verify that:

- the information contained on printed Request form is correct;
- Box IX of the Request form has been signed;
- all elements of the international application as indicated in Box VIII of the Request form have been attached; and,
- the diskette containing the PCT-EASY zip file of the International Application has been enclosed and has been clearly labeled "PCT-EASY", with the applicant's or agent's file reference, and the first applicant's name.

ATTENTION

DO NOT modify any indications on the Request form printout. The attached PCT-EASY application has been locked. If an error or an omission is discovered at this time, you must copy the submitted application as a template and make the change or correction in a new application (using the submitted application as a template). You may create such a template by copying the submitted application from the "Stored Forms" folder to the "New PCT Forms" folder. Open the new (.OWO) file created in the "New PCT Forms" folder, correct the errors and proceed with the submission process again.

The demand must be filed directly with the competent International Preliminary Examining Authority or more Authorities are competent, with the one chosen by the applicant. The name or two-letter code of that Authority may be indicated by the applicant on the line below:

IPEA/ EP
